Provider

Git & GitHub

### FAMILIAR WITH

Sqlite

Bloc

Html5

CSS

Bootstrap

Postman

Data Structure

C

Figma

MVC & MVVM

### PROJECTS

#### Music Player (Tunzza)

It's an Offline Music-Player App made by flutter, using Hive as database . GetX used for State-management and used MVVM architecture . It have favorite and playlist and initially the app will ask for permission to get all audio files on the users device, it have mini-Player and also having Status bar for current Playing with info, And also Hosted the App in Play store,

Tesla

Playstore :<https://play.google.com/store/apps/details?id=in.brototype.Tunzza>

## Job Portal Application (Gotyya)

An Online Application for jobs and other services, It's an job portal Application where users can search and apply for job openings, in the same application recruiters can post job details and seek applicants. The app is quite beneficial for both applicants and recruiters.

### Features :

- User can see Job openings and jobs related posts.
- User can track the job Applications levels.
- User can chat when application is Shortlisted.
- Recruiters can arrange video call with applicants.
- User can see Job related notifications

Used MVC architectural pattern and Provider as state management , dio used for calling Api -methods, python django as backend, while installing app will ask for a mail verification. I collaborated the app with a Backend Developer
