Thiruvangoor High School

Projects

Benefits Beats E-Commerce platform ⭘ 🌐   JUN 2022-JULY2022

- **Users**
  - Create account with OTP verification
  - Edit and update profile
  - Forgot password option in login page
  - Tracking and cancel orders
  - View all orders and download invoices
  - Search and filter all products
  - Add & remove from wish list
  - Add , remove from cart and make changes in quantity before placing order
  - COD & Online payments with Razorpay integration.

- **Admin**
  - Login page
  - Dashboard with graphical representation of transactions and orders.
  - List out and perform CRUD operations in products.
  - Users table
  - Block unblock users
  - View all orders
  - Track and approve orders like shipment.

Technologies and tools used

▪ Node js ▪ Express js ▪ Handlebars ▪ MongoDB ▪ Bootstrap ▪ AJAX ▪ JQuery
▪ Razorpay ▪ Twilio

Deployed in AWS EC2 instance with Nginx reverse proxy

HotelBooking ⭘   Ongoing

Is a hotel booking app. it has 2 phases - user and admin. with frontend react js and backend node js and MongoDB. I am expected to complete this project within one month.

Mini Project

React_Netflix_clone ⭘ 🌐

Responsive Netflix with Rest-API and ReactJs for designing. I added a more attractive design to make Netflix Clone for uniqueness.

React_olx_clone ⭘

Olx clone with Rest-API and ReactJs for designing. and user can add product and view products

UserManagment ⭘

Combined with CRUD Operation, we can manage users and update or delete them accordingly. I developed this website with a self-created UI design. With React.Js front-end and NodeJs as back-end

Incubation Management ⭘

Incubation Management System to register to start up and book slots. This website is included with both admin-side and user side and they have separate accessing pages. Users have to register form which enables them to check the status of their requests. Admin panel consists of more features like accepting incubation, allocating slots and managing users IDs, etc...I used ReactJs as frontend NodeJs as backend

Declaration
