- User management using react , node js and mongodb
- Netflix clone with react and TMDB api integrantion
- Olx clone with react and firebase
- Incubation management with react , node js and mongodb

Languages

- English
- Hindi
- Malayalam
- Tamil
- Kannada

About Me

self-taught Mern stack developer who loves to solve problems .digitally with top notch technologies. I have completed 2 real time projects and 4 mini projects .My first project is a vehicle rental web site with backend node js and frontend handlebars . Now iam in my second project its a food delivery app .

Projects

- **Livedrive - Vehicle rental app**

  Livedive is a car rental application , it have 3 phases -user, admin, and vendor. in this user can book the vehicle by searching . and apply coupons whenever he needs.if a vehicle has booked , any other can not access that vehicle.
  vendor can manage vehicle and access to get monthly revenue. admin can manage vendor , user , and vehicles . so he will give the permission to vendor for login .

  Key features:-
  - Socket io
  - Multer
  - Node mailer
  - Twilio
  - Razorpay

- **Feedish - Food delivery app**

  Feedish is food delivery app . it have 4 phases - user, restaurant owner , delivery boy and admin. with frontend react js and backent nodejs and mongodb . iam expected to complete this project within one month.

Education Background

Brototype

02/2022 – Present

- Self learning platform
- it helps developing coding skills by providing various programming tutorials and tech career topics .
- Industry experts assign and review our projects

Work Experience

Mahle anand filter system pvt ltd

04/2021 – 08/2021

- Even though i started working as a plastic technologist , later i understood that this is not my cup of tea , so i started watching some coding videos . Eventually i much in to programming . So i decided to join brocamp as an intern
